Company Brochure

ATLANTIS
PLUMBING COMPANY LTD

About us

We are Mechanical plumbing and heating contractors serving the new build industry predominantly.

Our company was incorporated in 2007 and has built an excellent client base which include, Bellway Homes, Linden Homes and Galliard Construction amongst others.

The scope of works we undertake is also large and not limited to the plumbing and heating aspect, we also cover Boosted Cold Water Tanks and Pumps, Plant Rooms, Dy Risers, Undercroft Drainage including Cast Iron, Sprinkler Systems,

Underfloor Heating, amongst other works.

We also have extensive experience in commercial projects such as schools, offices and other commercial premises and specialise in the refurbishments of listed buildings where we have completed Colindale Hospital, The Officers Mess Mill Hill, Chingford Town Hall, Frogmore Hill, Frythe at Welwyn amongst others.

We also offer a full design service should this be required.

We have a large core of highly skilled and trained engineers that cover projects from one plot to three hundred plots with a huge working area from as far as North as Peterborough and as far South as the majority of the M25 corridor.

We have always delivered on every project we have undertaken often coming in to deliver on developments that are not quite straight forward where others have failed.

Featured projects

Our values

We strive to set ourselves apart from other companies in our industry by offering the highest levels of quality to our customers on all aspects by delivering a tailored and highly professional product and service.

We believe our format with none of our engineers working on a price system format, with full time supervisors for every project sets us apart from other companies and gives our customers the highest level of end product and service. Our satisfaction comes from the product we leave our customers.

We are affiliated with Gas Safe, CQMS, CSCS, SSSTS and other health & Safety organisations and can satisfy all aspects of Health & Safety with our resident H&S expert attending our developments on a regular basis.

Along with our clients we have also picked up awards with the most recent being

an NHBC pride in the job award with Bellway at our West Drayton project.

We have successfully brought through many apprentices since our incorporation and are proud to say the majority still serve Atlantis Plumbing to this day understanding our highest values.

Our services

Special projects

We regularly carry out special projects from refurb buildings to schools and offices and have an extensive range of experience in these sectors of plumbing, heating and mechanical works.

Frogmore - Refurb

- ▶ Full Heating and Hot Water Systems
- ▶ High End Sanitaryware and brassware installation
- ▶ Oil Boiler and Tanks
- ▶ Swimming Pool Supplies

Our services

Renewable systems

We have vast experience in all renewable systems including ground and air source heating, Hot Water, solar systems, Biomass boilers & MVHR Heat Recovery Systems amongst others.

Plant Rooms

We have extensive experience and expertise in all aspects of plant room installations including CMS systems.

Booster Pumps and Tanks

We can provide full design and installation for all your Boosted cold water requirements no matter how big the project required.

Undercroft Drainage

This seems to have somewhat become a speciality of ours in recent years and we now have an engineer dedicated to the installation of pipefitting in all formats of this ranging from plastic, copper, iron and all systems right through the car parks and riser cupboards.

Cast Iron Pipework

We still believe threaded Iron is one of the soundest systems for running commercial gas pipework and the neatest. Whilst others are using some of the more modern less sightly systems we have held faith in the threaded iron due to its proven robust nature and more sightly appearance.

Sprinkler Systems

We offer the full design, installation, commission and maintenance of sprinkler system applications.

Further projects
